

# OUR PROCESS

From concept to sales, this is how we bring it all together.

1.

## THE BRIEF

You, our client, brief our specialists on a concept you would like to take to market.

2.

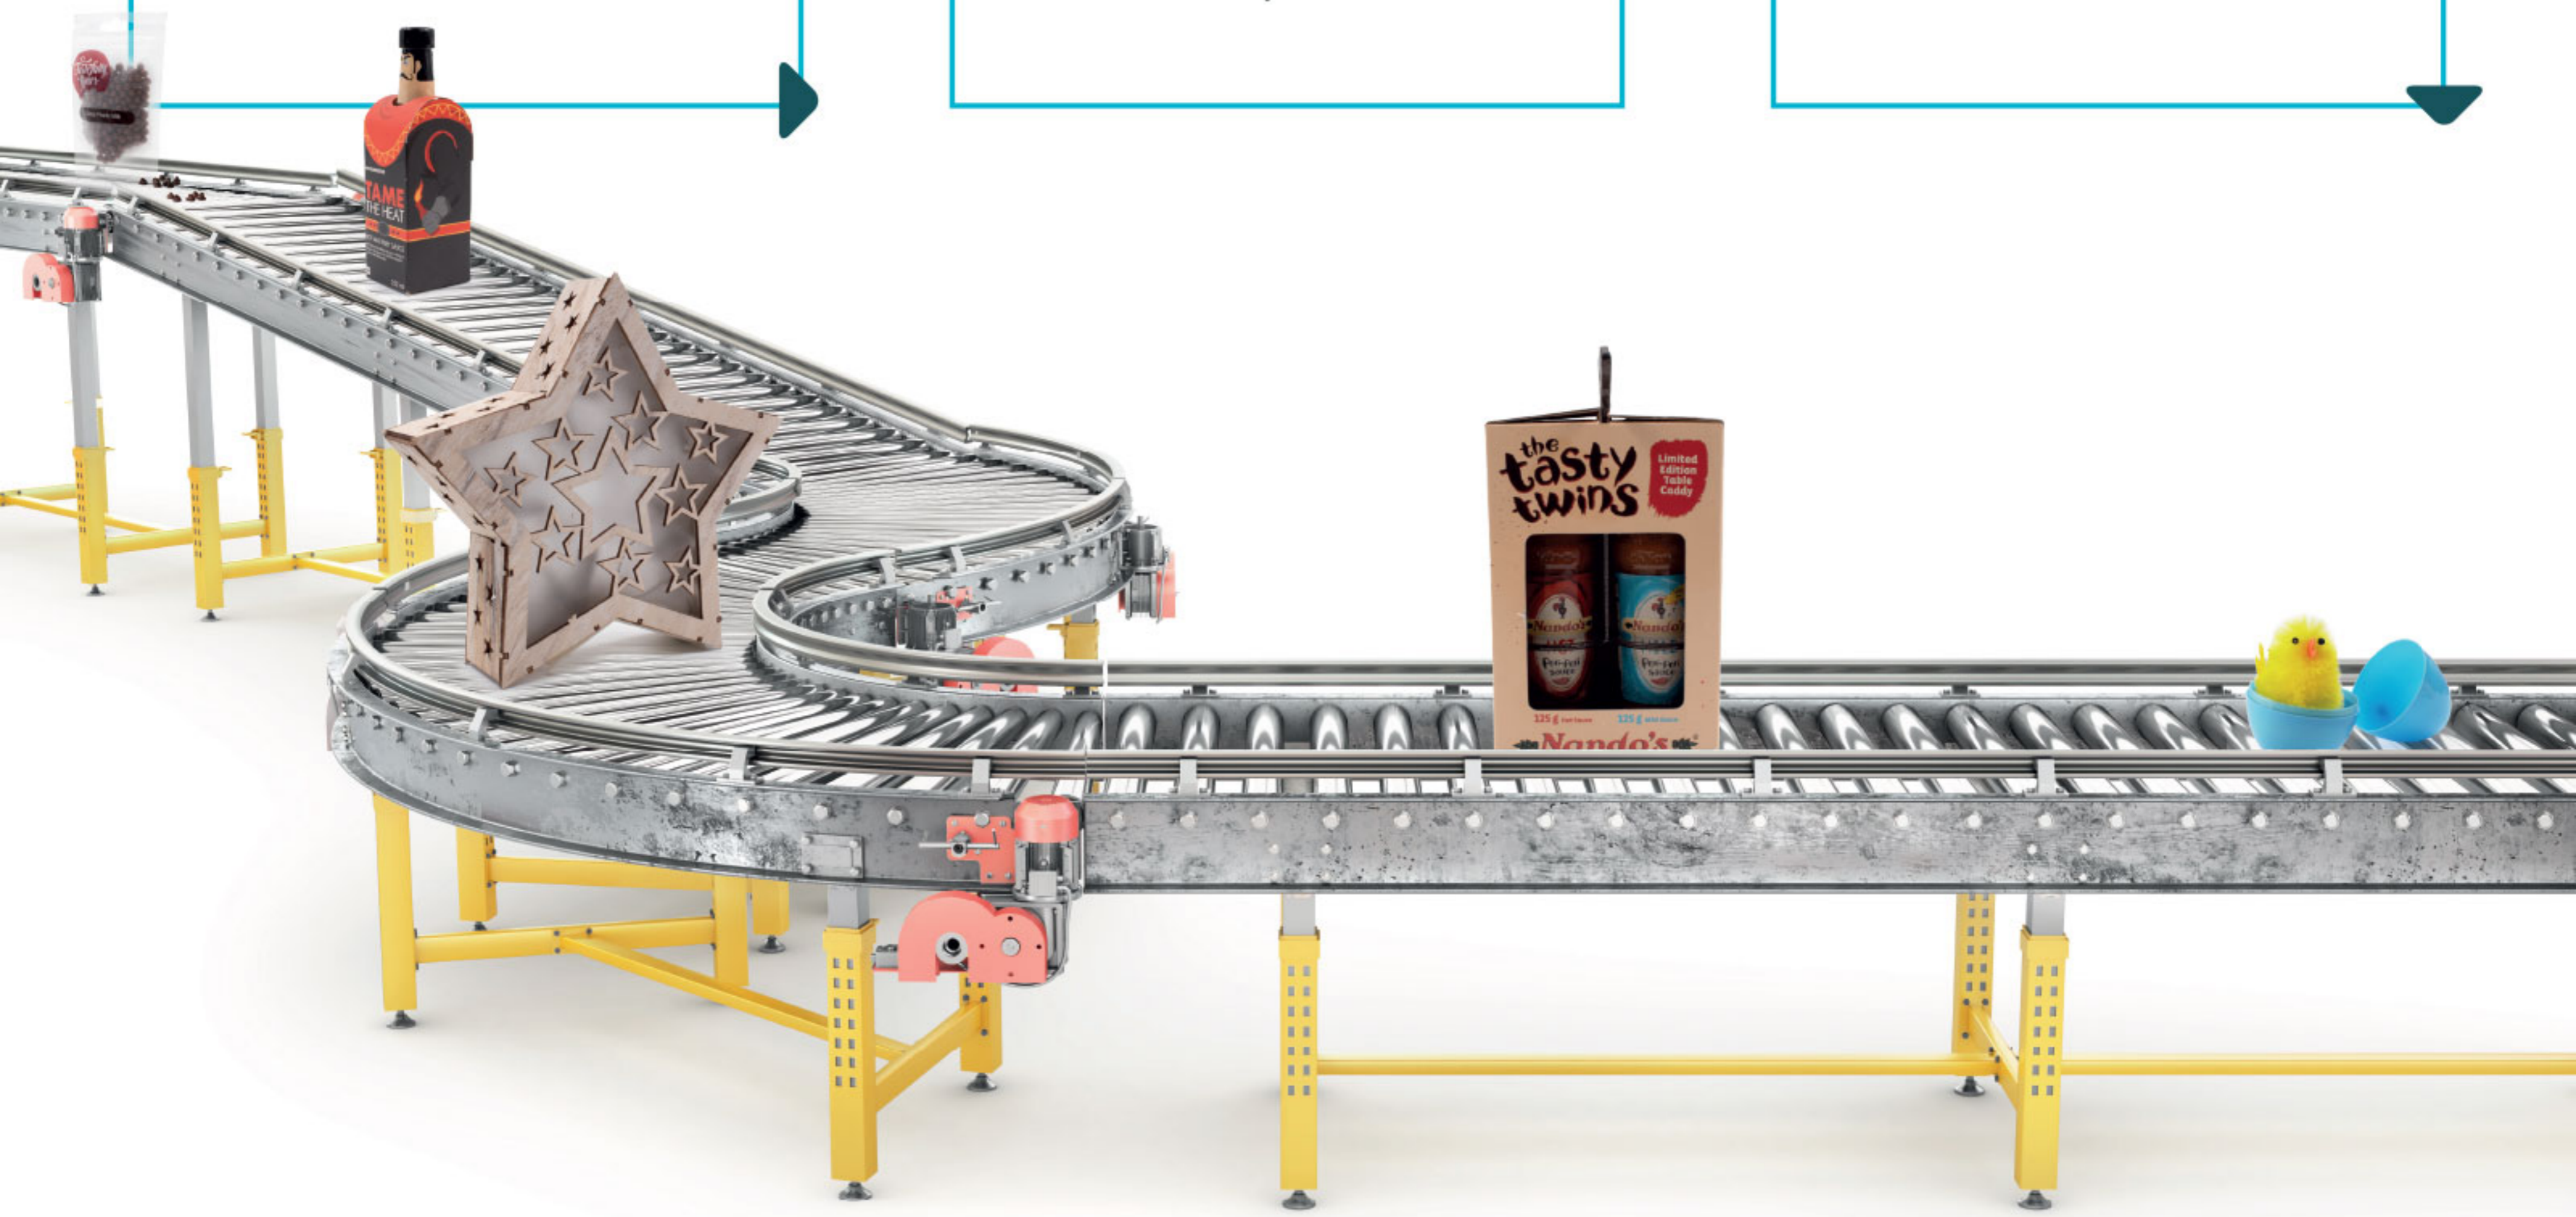

## RESEARCH

We do extensive market research to understand what the current trends are and how to bring your concept to life.

3.

## SUPPLIERS

Having built an exclusive global supplier network, we reach out to them to locate the very best products available.

6.

## PRODUCTION

If you are satisfied with the quote, we start full-scale production.

All the bespoke components needed are imported to our Johannesburg factory, where we assemble, pack and wrap your order.

5.

## SAMPLES

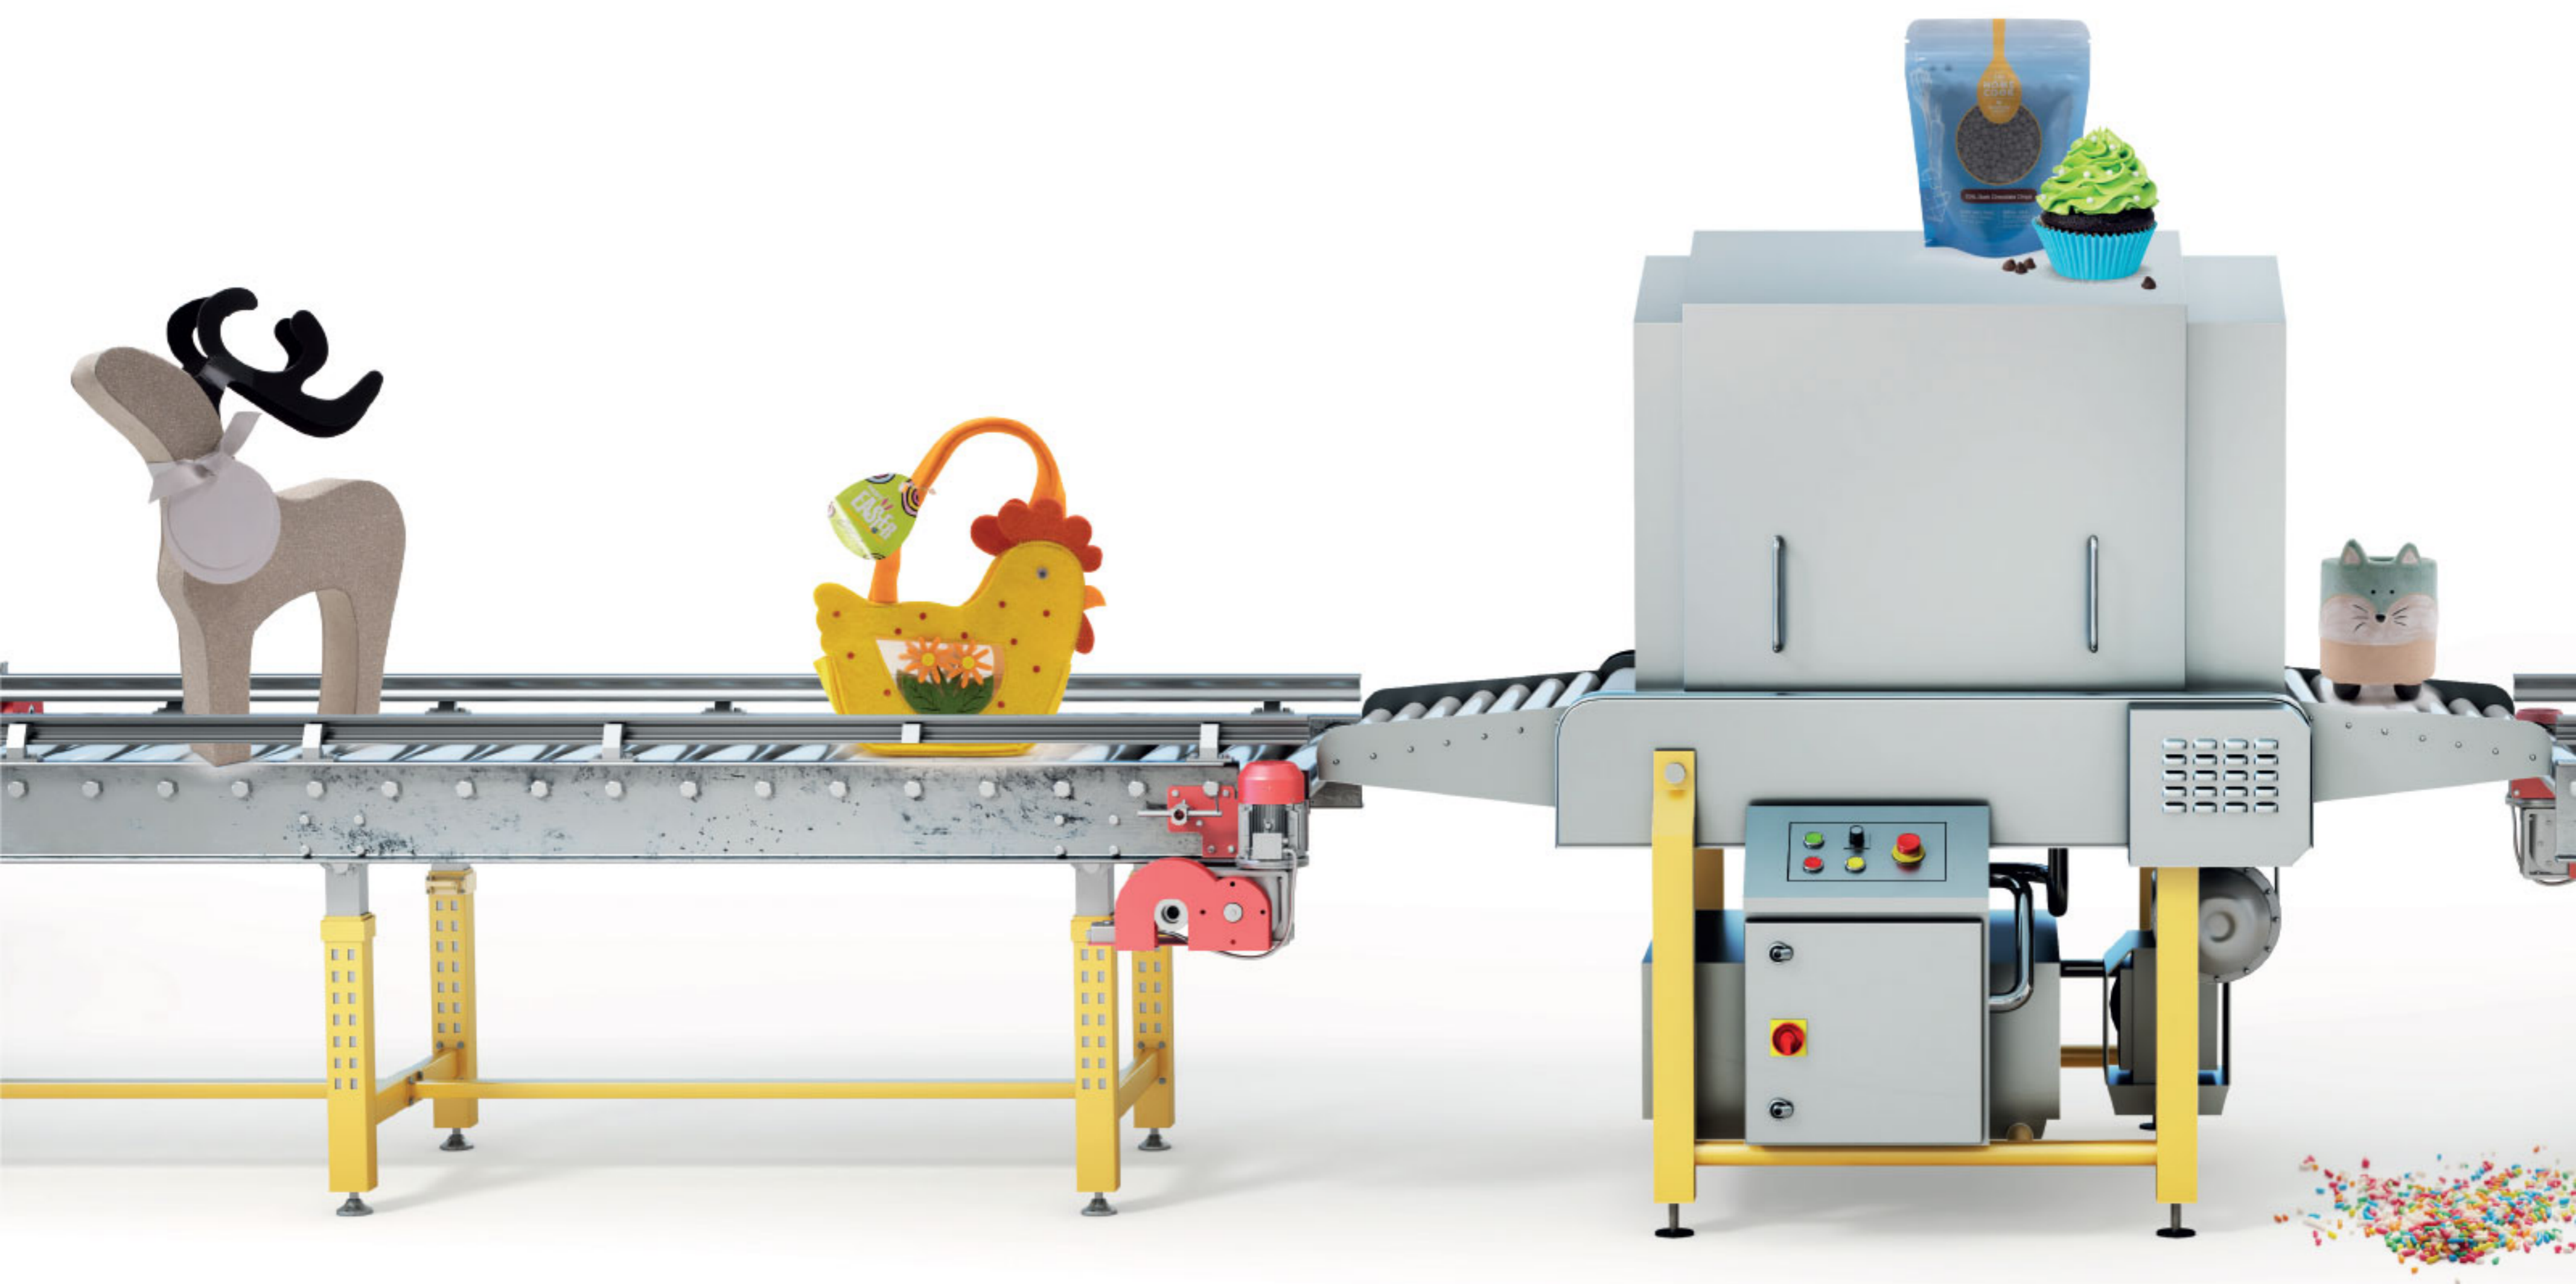

With a clear direction and quality products at hand, we custom-make an initial sample for approval.

4.

## QUOTE

Once the concept direction is approved, we develop and submit production pricing.

7.

## DISTRIBUTION

After everything is assembled, we distribute your goods to the required warehouses.

8.

## IN-STORE

Your unique products are displayed in your stores.

9.

## REVENUE

Consumers purchase your premium solution, and you enjoy a return on investment.
